

**Beyond Efficiency:
Tech That Transforms Advice**

How Hard Can It Be?

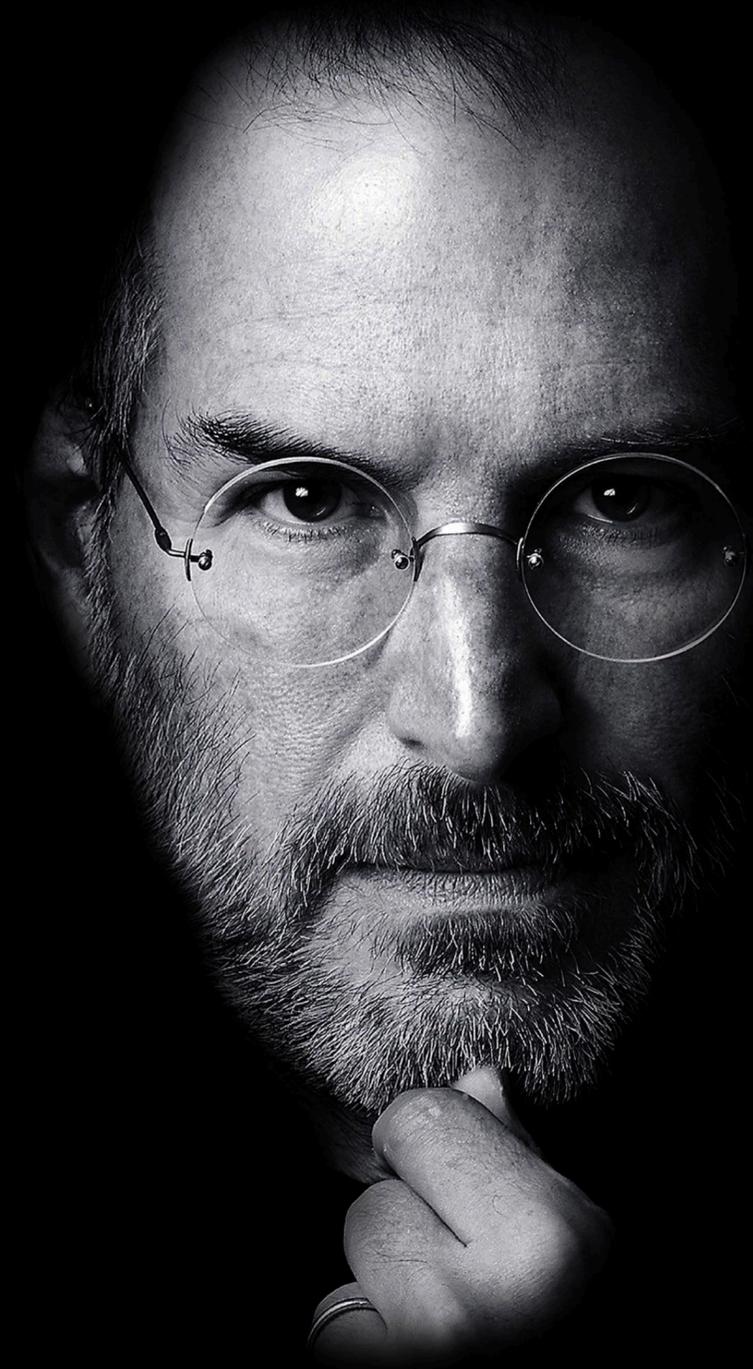

Very hard. No-one's done it before.

“

Simple can be harder than complex: You have to work hard to get your thinking clean to make it simple.

– Steve Jobs

iPod story

It feels like you have to work for your tech rather than your tech working for you

🕒 “We have to train the whole team on how to move from one system to the next”

🗣️ None talk to each other properly

'Vintage' Client Onboarding Flow

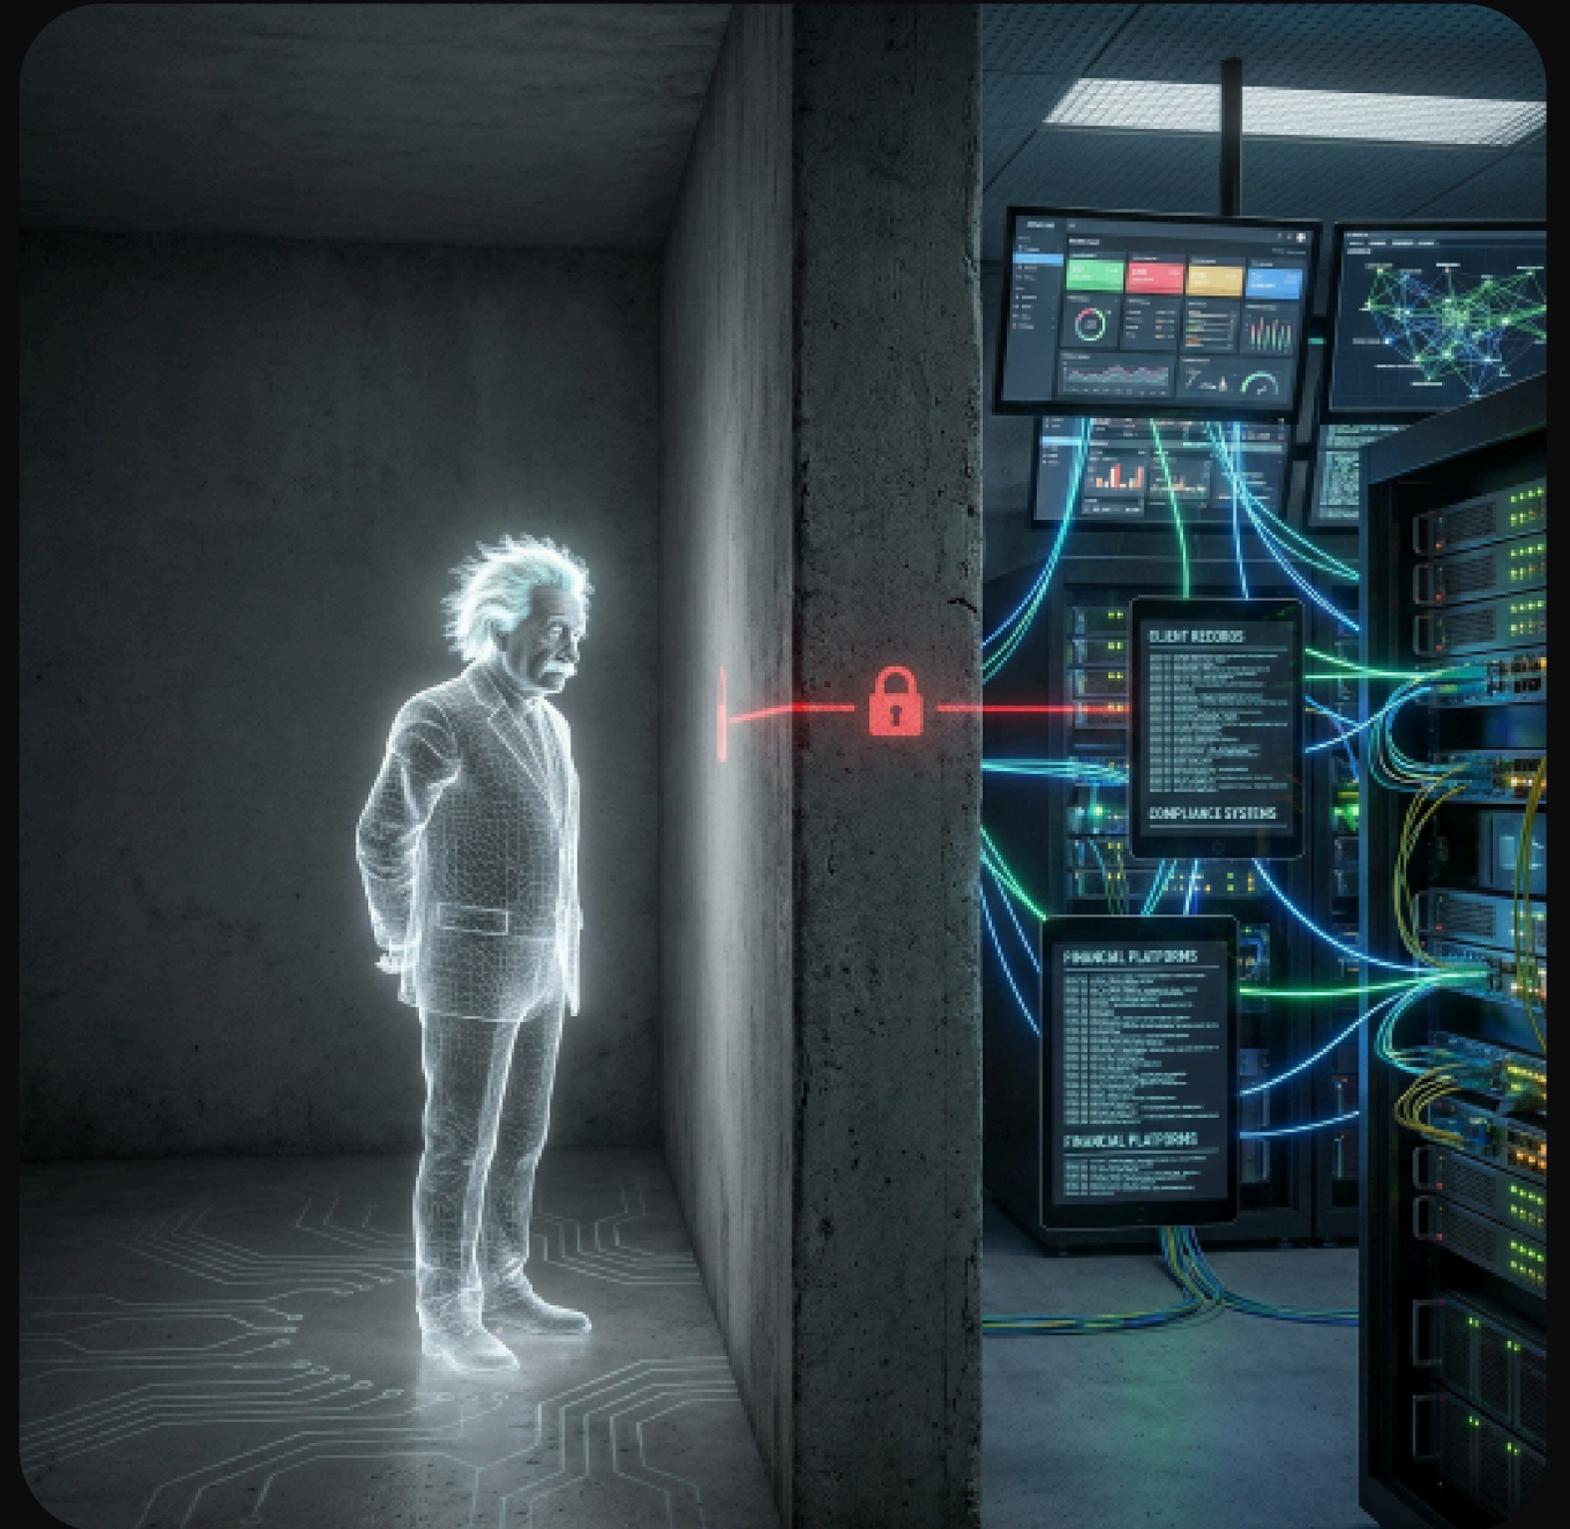

AI only works well sitting on top of tools which work together

**AI can be as smart as
Einstein...**

...but if it can't access your tools and data, it has nothing to work with and no data to make decisions with.

**If the data doesn't stay
up to date or the quality
is poor...**

...AI will make the wrong choices.

To take advantage of the AI revolution, you need:

All your software to talk to each other seamlessly

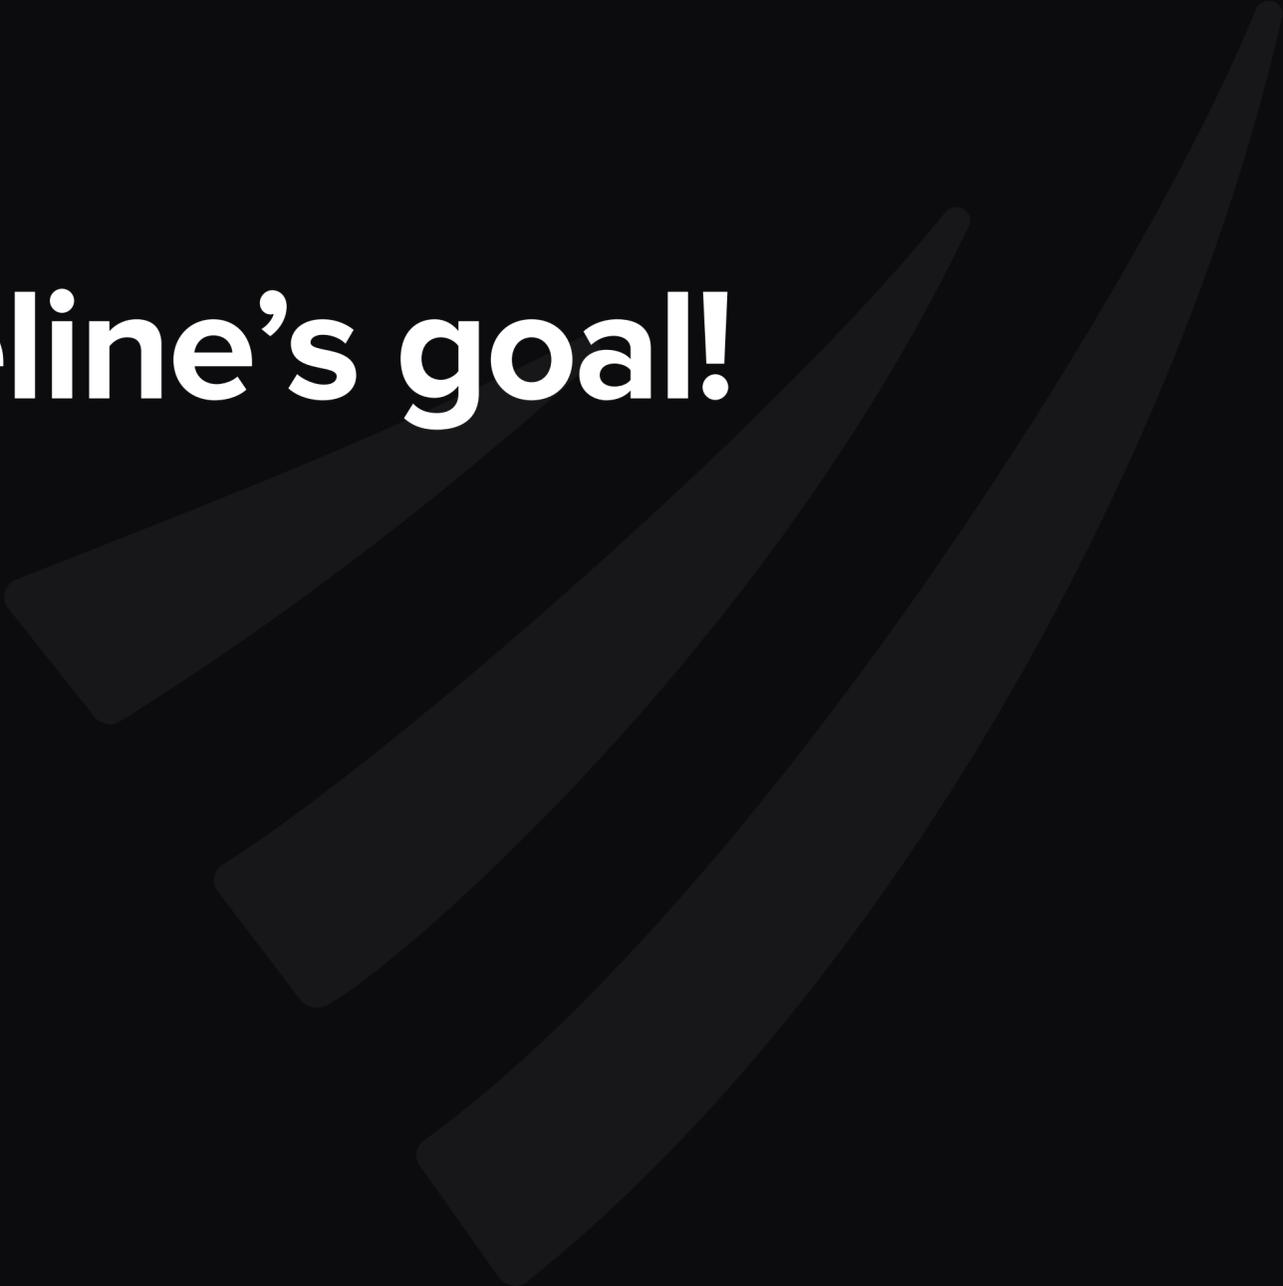

Great data which effortlessly stays up to date

High-quality software

Turns out, this is Timeline's goal!

Three dark gray, curved lines are positioned on the right side of the slide, starting from the bottom and curving upwards and to the left, creating a sense of motion or a path.

What we've achieved in 2025

A new, customisable FactFind

Letters of Authority tool updates

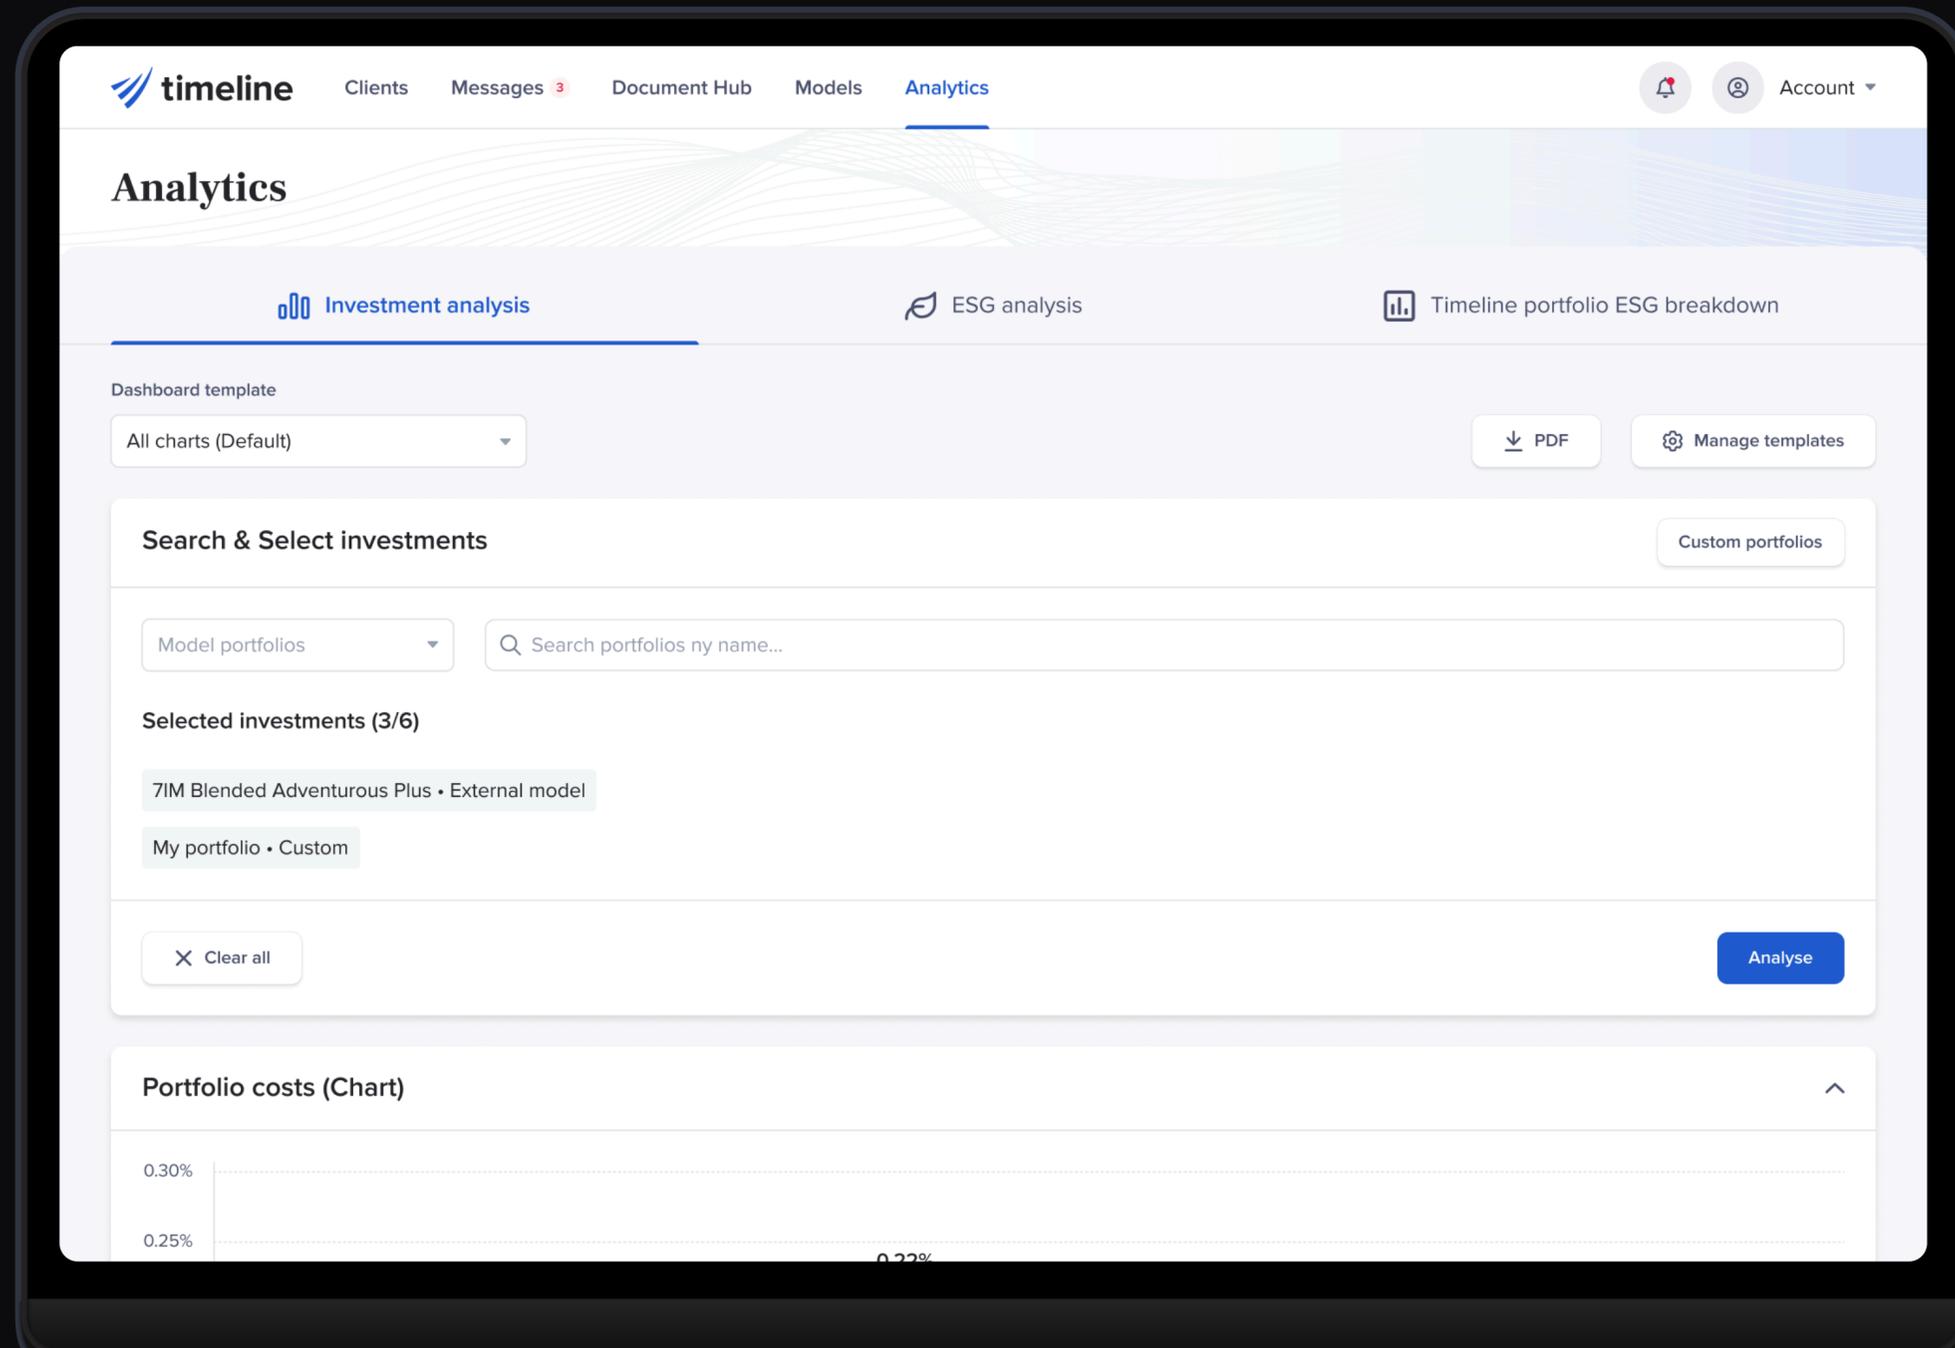

- ✓ Clear outcome expectations per provider, enabling better adviser planning
- ✓ Fewer delays by avoiding providers that don't accept Letters of Authority
- ✓ Timely, clear notifications outlining status and next steps
- ✓ Less rekeying through reuse of FactFind client data
- ✓ More stable Pensionlab integration with fewer errors and rework

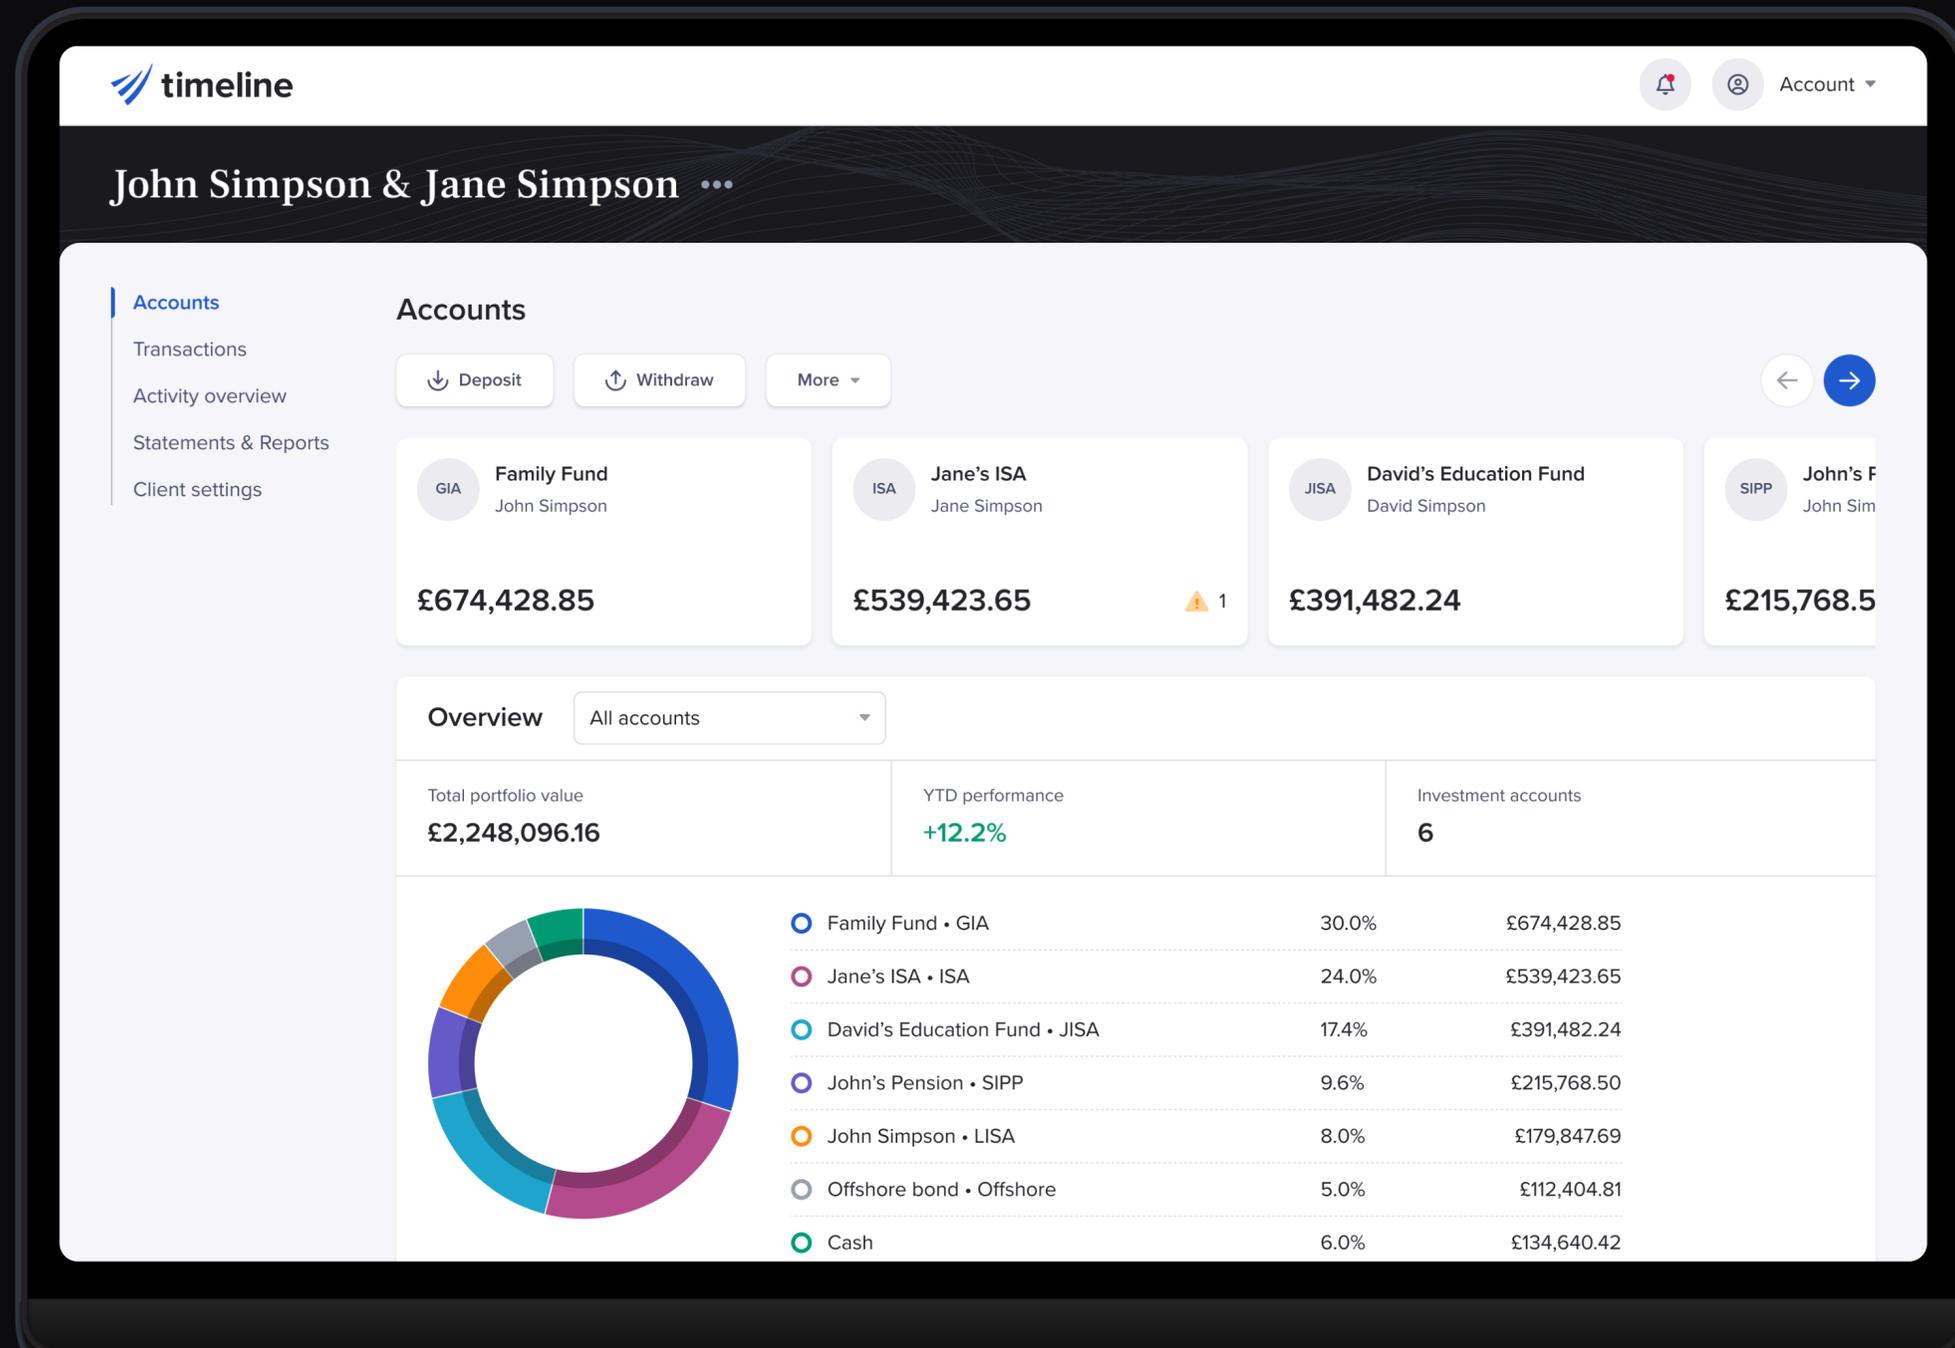

Customisable reporting suite

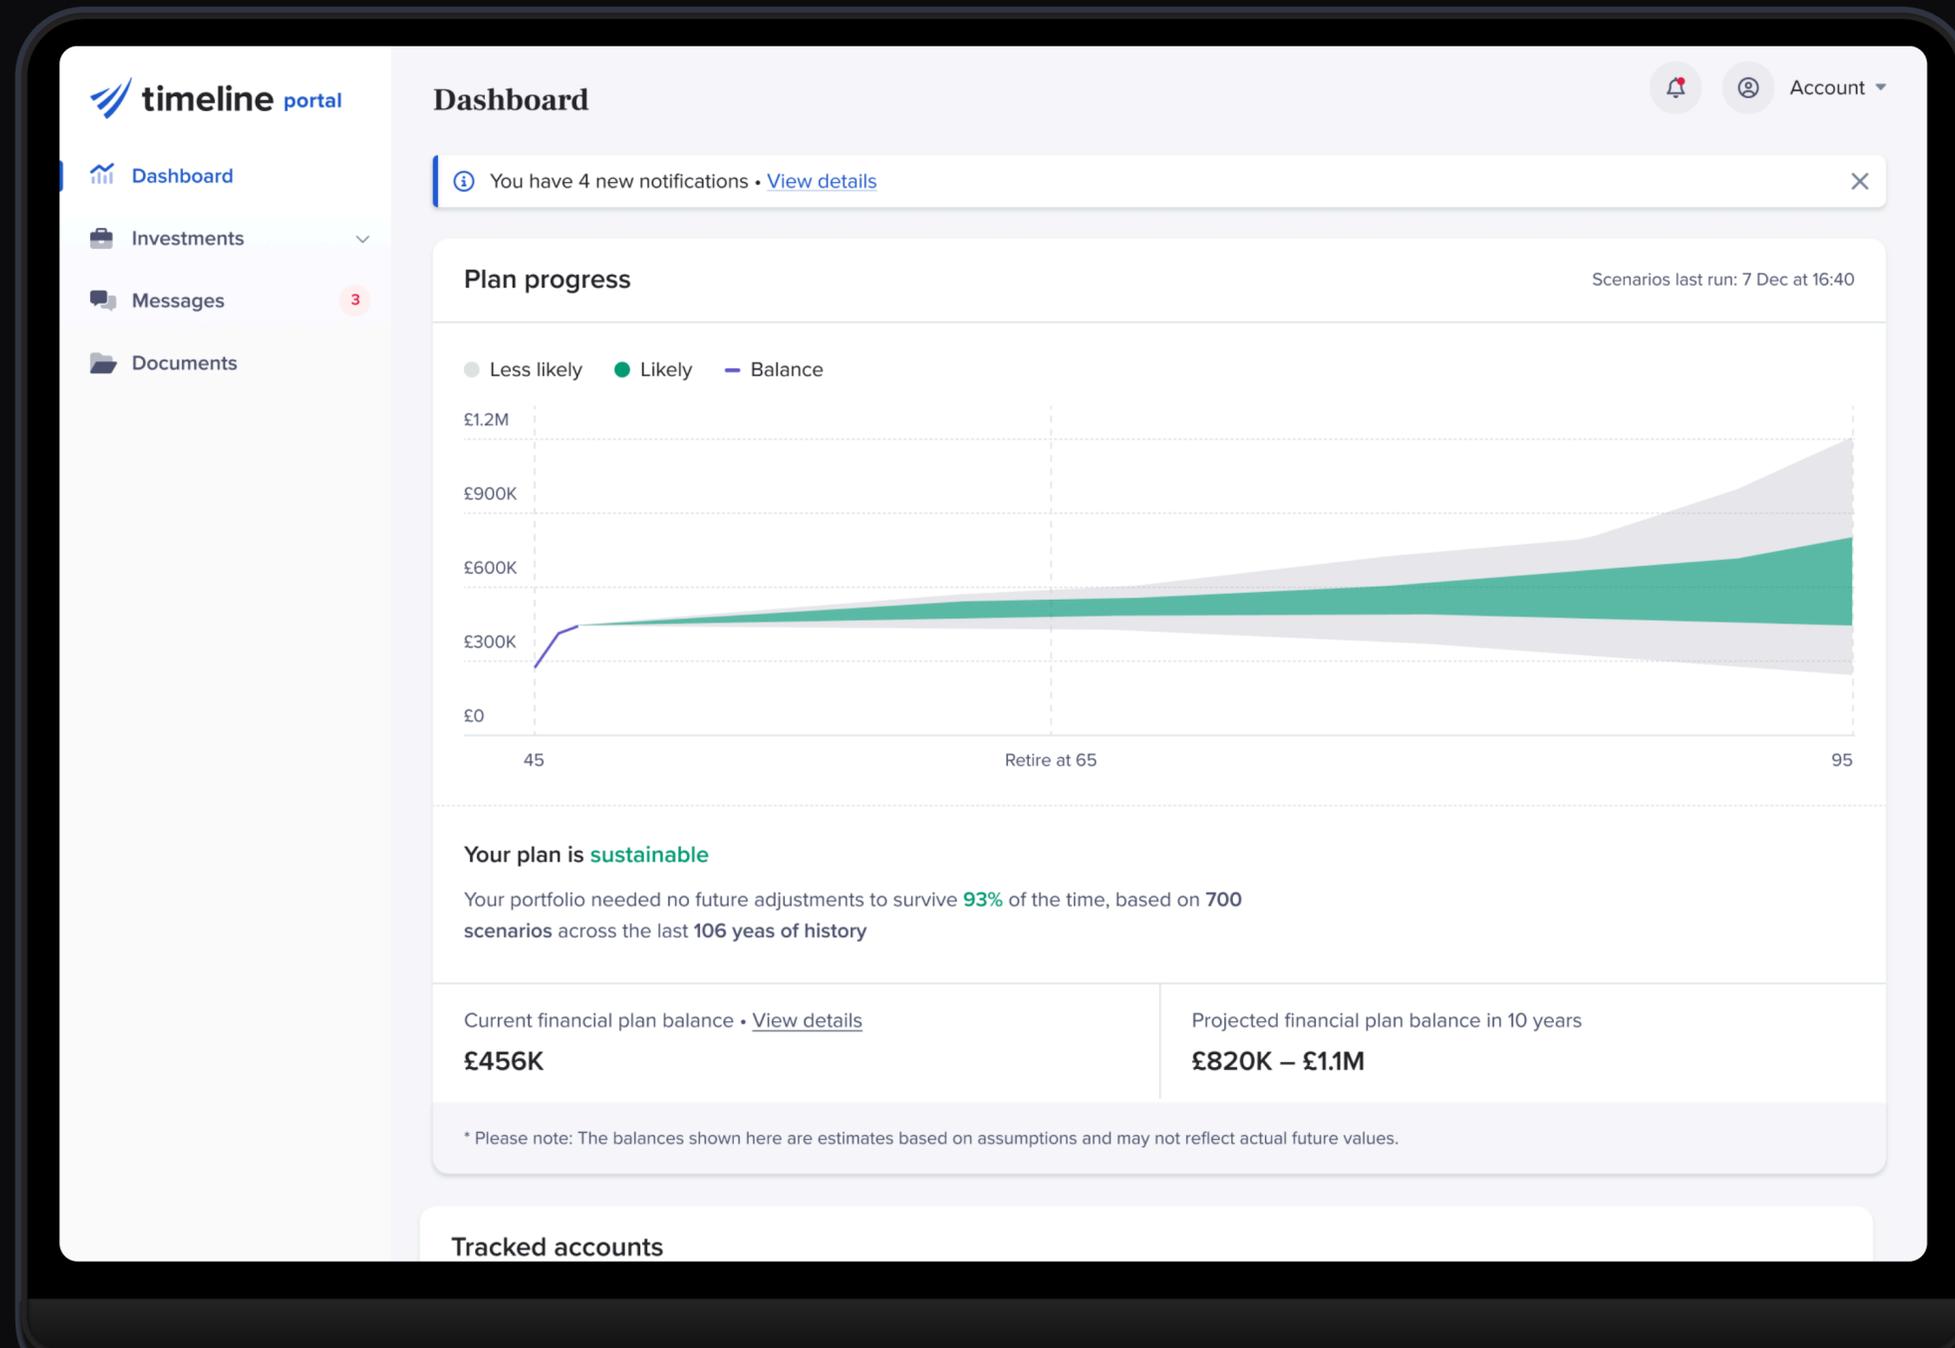

In-depth, customisable investment analysis

Built an investment platform

Built a client portal

Cashflow modelling now rivals Voyant and CashCalc on modelling scenarios

More accurate modelling and calculations

Ability to model >95% of client circumstances

Tax-planning

Clarity in our calculations

And Risk Profiling

Risk score

Client	Risk Score	Interpretation
John Simpson	6	Balance between defensive and growth assets
Jane Simpson	10	Focus on growth and high volatility

What this means for John Simpson
Your portfolio would offer a balance between what are known as 'defensive' assets and 'growth' assets, leaning towards more 'growth' assets. Defensive assets tend to be low-growth but stable, while growth assets tend to be high-growth but volatile.
[Learn more](#)

What this means for Jane Simpson
You are happy to focus totally on growth and accept a high level of volatility in your portfolio's value to maximise your assets' potential.
[Learn more](#)

Please note: John Simpson's risk score may change when the capacity for loss is available

Some answers from **Jane Simpson** seem at odds with their overall attitude to volatility score. You may wish to discuss these answers with them. When you open the questionnaire, you will see we have flagged the answers in question.
